PROPOSITION OF A PART-TIME EMPLOYMENT CONTRACT FOR A RESEARCH-SUPPORT STAFF IN THE FRAME OF THE FNP PROJECT HYCAP

The proposition is for a PhD student with a good knowledge in materials science. The research associate should synthesize porous carbons and characterize the obtained materials by temperature programmed desorption, gas adsorption and Raman spectroscopy. A bibliography survey on the preparation methods of carbons and properties of carbons is also expected.

This proposition is for 9 months, **starting from October 19th, 2020**.

Remuneration: for 40 hours per month = 1110 PLN gross

Candidates wishing to apply are requested to send i) their Curriculum Vitae (including a detailed description of research experience and traineeships, a list of publications and presentations in conferences); ii) an application letter for the position; iii) copies of diplomas to Professor F. Béguin (francois.beguin@put.poznan.pl) before **October 13th, 2020**.
